11. (New) The radio receiver according to claim 8, further comprising:
a transmission device for receiving one of the operating instructions
and at least sections of the operating instructions from a central device.
12. (New) The radio receiver set according to claim 11, further comprising:
an operational control element for retrieving and outputting one of the
sections of the operating instructions, the one of the sections of the operating
instructions being adapted to a specific operating state of the receiver.

13. (New) The radio receiver set according to claim 12, wherein:
the operational control element permits a repeated actuation in order to
output other sections of the operating instructions.
14. (New) The radio receiver set according to claim 13, further comprising:
a further operational control element, wherein:
the operational control element and the further operational
control element enable a section of the operating instructions pertaining to the
further operational control element to be output by actuating the operational
control element and by actuating the further operational control element.
